

## *Central DuPage Healthcare Systems selects Machensoft's Security Migration Process (SMP)*

**Glen Ellyn, Illinois.- November, 2008**—Kinsey & Kinsey, Inc. announced that Central DuPage Healthcare Systems has licensed the Machensoft Security Migration Tools to help migrate their LAUA security to LS9.

Central DuPage Healthcare chose Machensoft's SMP process over Lawson's Fast Track solution based on the accuracy of the model and the relatively short time to implement. With the ability to determine actual user usage, include custom tokens, and build accurate drill around and select tables, SMP provided functionality not found in any other solutions.

Specifically, the Machensoft SMP will monitor and report on all user token access over a specified time period. This information is used to tune the existing LAUA security settings prior to converting to LS9. Once complete, the migration tool will automatically build LS9 Tasks and Roles from existing LAUA security settings. Automatic assignments of Roles to Users complete the build process. Further tuning of LS9 settings for conditional logic, field level security, and user/token access are then applied. Continued monitoring of token usage can then be used to tweak LS9 security going forward.

### **About Kinsey & Kinsey**

Kinsey & Kinsey has been a Lawson Reseller and Implementation Partner since 1996 and has earned the designation of "Partner of the Year". Kinsey & Kinsey has sold and implemented a number of large deals with Lawson and specializes in small to medium companies looking for a cost effective Tier One solution. As a Lawson Reseller and Implementation Partner, Kinsey & Kinsey has developed a senior level staffing model that offers superior consulting services in both the technical and application sides of Lawson Products.
