

Activity Monitor (Lawson S3 and Landmark)

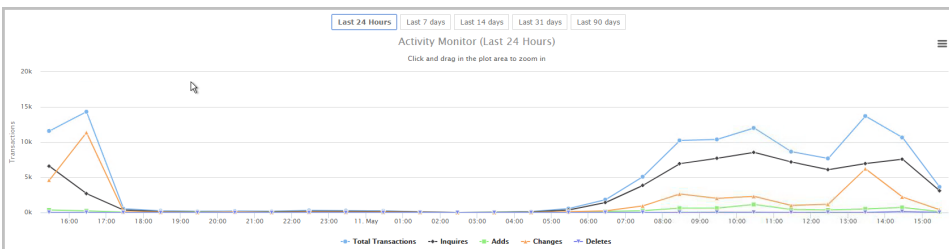

Greater Visibility Into Infor/Lawson User Activity

In the Cloud or On-premise

Flexible and Easy to Implement

Kinsey's Activity Monitor provides further insight into your Infor-Lawson environments. By providing detailed queries of User session activity for either your Lawson S3 or Landmark applications you can now monitor date and time sensitive transactions.

Analytics

Powerful Reporting

User	Full Name	Form	Form Description	Function	Date/Time	Key 1	Key 2	Key 3	Key 4	Key 5	Audit

Activity tracked for each user includes the form or business class, date, action and keys to the record processed.

Key Benefits

Many robust features are included with your Activity Monitor application, including User Usage Reports by:

- Form ID
- Source
- Date & Time
- Record Key
- User ID
- User Name
- Screen Action

Additionally, you can view the query results in:

- Microsoft Excel
- PDF Viewer
- Internet Explorer or Chrome

Available Fields Include:

- User ID
- User Name
- Form ID or Business Class
- Description
- Source
- Source IP Address
- Host Name
- Product Line
- Date & Time
- Record Keys
- Screen Action
